

Senior Frontend Engineer with 5 years of experience building production in React/TypeScript — from luxury retail to multi-agent AI platforms. Architecture, design systems, performance, and team leadership. Ship AI-augmented codebases daily with Claude Code, MCP and BMAD — agentic workflows are a core part of how I engineer, not a side experiment.

WORK EXPERIENCE

- Senior Frontend Developer

Since December 2021 (4 years+)

Balink Jerusalem

- Delivered **React/TypeScript** apps for luxury brands (**Louis Vuitton, Dior, Messika, Tiffany & Co.**) used daily by **Sales Advisors** across **global retail stores**.

- **Led a distributed frontend team of 4 developers** across **Israel, France and China**, owning **architecture, code reviews** and delivery on multi-brand projects.

- Built a **complete catalog app for Louis Vuitton** from scratch, and shipped **2 WeChat Mini Programs** (Vuitton, Dior) within the strict **2 MB main-package limit** through custom **subpackages, zero-dependency components** and aggressive **bundle optimization**.

- Designed and developed an **internal back-office** for Messika and a customer-facing **digital card for Tiffany & Co.**, from **architecture to production** rollout.

- Grew from junior to team lead over 4 years: established frontend standards, mentored teammates and owned end-to-end delivery on cross-cultural, multi-brand projects.
- Senior Frontend Developer (Freelance)

From March 2024 to November 2025 (1 year)

Limova.ai France (Remote)

- **Sole frontend developer for the first 6 months:** designed and built the entire **frontend architecture from scratch** with **React, TypeScript, Next.js, Vite, Tailwind, React Query, Redux Toolkit and Supabase**, shipped to production for the V1 launch.

- Drove a **full product pivot post-launch** — from a SaaS for non-profit grant applications to a **multi-agent AI** platform for entrepreneurs and SMBs, now serving **3,000+ companies**.

- Acted as **Frontend Team Lead for 6+ months:** hired and onboarded 5 frontend developers, defined **coding standards, code review processes and sprint** workflows that scaled the team without sacrificing velocity.

- Translated **complex AI workflows** into clean, user-focused interfaces (chatbots, dashboards, agent configuration, WhatsApp integration), collaborating closely with product, design and AI engineering teams.

EDUCATION BACKGROUND

- Full Stack Web Development

From June 2021 to November 2021

Coding Academy Tel Aviv, Israel

12-week intensive bootcamp: JavaScript, React, frontend architecture, REST APIs.
- BSc in Accounting & Management

From September 2011 to July 2014

UPMF - University Pierre Mendes France Grenoble, France

LANGUAGES

•French — Native • Hebrew — Fluent • English — Professional

COMPUTER SKILLS

- Frontend** — **React.js, TypeScript**, JavaScript (ES6+), React Query, Redux Toolkit, Zustand, Tailwind CSS, shadcn/ui, MUI, PWA, i18n, Responsive & accessible UI (WCAG)

Tooling & Architecture — Frontend architecture, Design systems, Component-driven development, Performance optimization (LCP, TTI), Vite, Vitest, Playwright, Git, GitHub Actions (CI/CD)

Backend & Data — Supabase (Auth, RLS, PostgreSQL), NestJS, MongoDB, Mongoose, REST APIs, OpenAPI / Orval, Next.js (SSR/API routes)

Agentic & AI · Claude Code, BMAD methodology, MCP (Model Context Protocol), Context7, Playwright MCP, Sequential Thinking, Supabase MCP, shadcn-studio MCP, Ralph Loop, LLM integration (chatbots, multi-agent platforms, AI dashboards)
